OBJECTIVE

Full-stack developer and IoT engineer with hands-on internship experience in MERN stack development, AI/ML systems (YOLOv8), and cloud platforms. Passionate about building scalable, real-world applications — from production web apps to real-time computer vision pipelines. Seeking opportunities to contribute, learn, and grow in a dynamic software engineering environment.

TECHNICAL SKILLS

Languages: Java (Primary), JavaScript (ES6+), Python, SQL, HTML, CSS
Frameworks & Libraries: React.js, Node.js, Express.js, Bootstrap
APIs & Databases: REST APIs, MongoDB, Database Query Optimization
AI / ML: YOLOv8, Computer Vision, Object Detection, Data Analysis
IoT: Arduino, Gesture Sensors, MQTT Protocol, Real-Time Systems
Tools: Git, GitHub, Linux, IBM Cloud, Google Cloud, Postman, VS Code
Core Concepts: DSA, OOP, DBMS, SDLC, Agile/Scrum, Code Documentation

EXPERIENCE

MERN Stack Development Intern

May 2025 – July 2025

Shripadha Group & KITSW

Warangal, India

- Developed, tested, and maintained full-stack web applications using React.js, Node.js, and MongoDB; wrote clean, efficient, and reusable code throughout the project lifecycle.
- Built and consumed REST APIs with secure JWT authentication and role-based access control; optimized MongoDB queries improving backend response time by 35%.
- Collaborated in Agile/Scrum environment; participated in code reviews, managed codebase with Git structured branching, and maintained documentation for all assigned modules.

AI and Cloud Intern

June 2024 – July 2024

Edunet Foundation with IBM Cloud

Remote

- Developed and deployed AI-powered applications on IBM Cloud including chatbot development using IBM Watson; improved intent recognition accuracy by 20% through iterative training.
- Gained hands-on experience with IBM Cloud services including Watson Assistant, Cloud Foundry, and Object Storage; maintained documentation for code and model performance evaluations.

PROJECTS

Movie Rating & Review System | *React.js, Node.js, Express.js, MongoDB, JWT, Bootstrap* | [GitHub](#)

- Developed a full-stack MERN application with JWT authentication and role-based access control across 3 user roles; designed 10+ RESTful APIs with Express.js.
- Optimized MongoDB queries reducing average query response time by 40%; built fully responsive UI using React and Bootstrap for seamless experience across devices.
- Managed complete codebase with Git and structured version control; maintained proper technical documentation throughout.

Real-Time Crowd Monitoring System | *Python, YOLOv8, Computer Vision, Machine Learning* | [GitHub](#)

- Built an ML-based real-time crowd detection system using YOLOv8 achieving 92% accuracy across varied environments; implemented data preprocessing, model training, and performance evaluation.
- Optimized the YOLOv8 inference pipeline reducing processing latency by 30% for near-real-time performance; implemented multi-object tracking and density estimation.

Smart Gesture-Controlled Switch System | *Java, Arduino, Gesture Sensors, MQTT Protocol* | [GitHub](#)

- Built an IoT-based home automation system using Arduino and gesture sensors for touchless appliance control; achieved under 200ms response latency using MQTT for real-time device communication.
- Wrote efficient, well-documented Java code for gesture recognition logic with full ownership from hardware integration to software implementation.

CERTIFICATIONS

Salesforce Certified Agentforce Specialist — Salesforce Trailhead

Google Cloud Computing Foundations (GCCF) — Google Cloud Skills Boost

EDUCATION

Kakatiya Institute of Technology and Science (KITSW)

Warangal, India

B.Tech, Computer Science & Engineering (IoT) | CGPA: 7.70/10

2022 – Expected 2026

- Class XII (Intermediate): 87% | Class X (SSC): CGPA 10/10
